## RESULTS OF OPERATIONS FOR THE FULL YEAR AND QUARTER ENDED DECEMBER 31, 2022

### ***Investment Income***

Investment income increased to \$1.2 billion for the full year ended December 31, 2022 from \$1.0 billion for the full year ended December 31, 2021, primarily due to an increase in our portfolio's weighted average yield, partially offset by a decrease in our debt portfolio at par. Included in investment income is dividend income which increased from period to period. Also included in investment income are other fees such as prepayment fees and accelerated amortization of upfront fees from unscheduled paydowns. Period over period, income generated from these fees decreased due to a decrease in unscheduled paydown activity year over year. While these fees are non-recurring in nature, we expect repayments to increase when the interest rate environment stabilizes. Other income decreased period over period due to a decrease in incremental fee income, which are fees that are generally available to us as a result of closing investments and normally paid at the time of closing. We expect that investment income will vary based on a variety of factors including the pace of our originations and repayments.

Investment income increased to \$350.5 million for the three months ended December 31, 2022 from \$281.6 million for the three months ended December 31, 2021.

### ***Expenses***

Total expenses increased to \$639.5 million for the full year ended December 31, 2022 from \$527.3 million for the full year ended December 31, 2021, primarily due to an increase in interest expense, gross management fees and incentive fees. The increase in interest expense was driven by an increase in average daily borrowings coupled with an increase in the average interest rate, including non-recurring interest expenses. As a percentage of total assets, professional fees, directors' fees and other general and administrative expenses remained relatively consistent period over period.

Total expenses increased to \$188.0 million for the three months ended December 31, 2022 from \$143.8 million for the three months ended December 31, 2021.

### ***Liquidity and Capital Resources***

As of December 31, 2022, we had \$445.1 million in cash and restricted cash, \$7.4 billion in total principal value of debt outstanding, and \$1.4 billion of undrawn capacity on our credit facilities. The Company's weighted average interest rate on debt outstanding was 4.7% and 3.9% for the three months ended December 31, 2022 and September 30, 2022, respectively. Ending net debt to equity was 1.19x and 1.18x as of December 31, 2022 and September 30, 2022, respectively.
